

How DBDA boys Explaining python indexing to there CRUSH

```
In [1]: D = 'LEARN'
        E = 'ABOUT'
        A = 'Big Data ANALYTICS'
        R = 'IN'
```

```
In [2]: M = 'CDAC'
        Y = 'MUMBAI'
```

```
In [3]: Name = 'NAVNATH BHOSKAR'
```

```
In [4]: #slicing letters
        L = R[0]
        O = D[0] + E[2] + Name[2] + D[1]
        V = A[13] + E[2] + E[3]
        E = '_____'
```

```
In [5]: # final output
        print(L,O,V,E)
```

I LOVE YOU _____

```
In [6]: cdac = "Centre for Development of Advanced Computing"  
        print(cdac,"(C-DAC)")
```

Centre for Development of Advanced Computing (C-DAC)

```
In [7]: first_batch_dbda = "C-DAC Mumbai Education and Training"  
        print(first_batch_dbda)
```

C-DAC Mumbai Education and Training

```
In [ ]:
```
